WORK EXPERIENCE

Senior Software Developer Solulever India

10/2022 - Present

Noida

Achievements/Tasks

- Functioned as the central point of contact for designated projects, orchestrating clear and concise communication of project task statuses to internal teams and external client groups, ensuring harmonious collaboration and mutual understanding
- Produced conceptual diagrams and visual mock-ups, while overseeing the creation of detailed user interface specifications to ensure a comprehensive and visually appealing end product
- Formulate project completion schedules and diligently adhere to assigned deadlines, ensuring timely delivery of high-quality results
- Conduct comprehensive research and assessment of alternative solutions, offering well-informed recommendations based on thorough analysis and evaluation

Software Developer 1 Rakuten

10/2019 - 10/2022

Bengaluru

Achievements/Tasks

- Designed and developed sophisticated user interface components and seamlessly integrated them into the application, ensuring a seamless and intuitive user experience
- Implemented advanced optimization techniques to enhance application speed and scalability, resulting in an efficient and high-performing user interface
- Collaborated closely with back-end developers to uphold the integrity of the UI across the entire development lifecycle, ensuring a cohesive and seamless user interface experience

EDUCATION

B.Tech - CSE

Birla Institute Of Applied Sciences, Nainital

08/1015 - 08/2019

redux-saga

PROJECTS

UPL Sandbach (10/2022 - Present)

- Employed the Ant Design framework and Highcharts library to develop a feature-rich analytics dashboard, enhancing the application with robust data visualization capabilities
- Led the team in the successful execution of project, ensuring adherence to timelines and high-quality deliverables. Implemented robust bug-handling processes and provided comprehensive technical support to guarantee the seamless completion of project

Data Wrangler (04/2021 - 07/2022)

- Tool to allow non-big-data/spark users to launch ad-hoc ETL Jobs or schedule recurring jobs using native SQL queries. Motivated by the need of migrating over 120 transformations from Teradata into spark in Redbasket Mart Implementation, developed a Config Driven (YAML) Spark job. This Data Wrangler tool provides another layer of abstraction to the same
- Key achievement: Replicated airflow functionalities in UI

Pipeline Monitoring (06/2020 - 04/2021)

- App to create and monitor the quality of the ingested data i.e. correctness, freshness, and count variance of the table data in the pipeline
- Implemented Docusaurus for interactive documentation
- Implemented dynamic DAG using visx airbnb
- Overcame the limitation of manually monitoring pipelines

Aquafadus (11/2019 - 06/2020)

- One stop tool for analysis of Data Metrics using Visualisations on multiple timeframes
- Implemented synced Data Visualisations
- Okta based authentication and authorization
